

Materials List Example 1:

Material	Quantity or Amount	Use
Stop watch	1	Time 2 minute test
Blindfold	1	Cover eyes of test subjects
Measuring tape	1/10 meter tape	Measure distance accurately between subject and test
Wooden blocks 5 cm square	10	Test material

Materials List Example 2:

100 ml beakers	3	Measuring liquids to be tested
100 ml graduated cylinders	1	Measuring reactant
Celcius thermometer	1	Measuring heat loss/gain
0.2M HCl	225 ml	Solution to be tested
Hot Plate	1	Increase temperature of liquid

Materials List Example 3:

Rubber band car	1	Vehicle to test
Rubber bands	100	Power for car
Measuring Tape	1/100 meter tape	Measuring distance
Washers	50	Change weight of car
Masking tape	1 roll	Hold on washers
