### **Google Books**

*Search Books* - works just like web search.

*Browse books online*

If the book is out of copyright, or the publisher has given Google permission, you'll be able to see a preview of the book, and, in some cases, the entire text. If it's in the public domain, you're free to download a PDF copy.

*Buy the book ... or borrow it from the library*

If you find a book you like, click on the "Buy this book" and "Borrow this book" links to see where you can buy or borrow it.

### **What Should I Read Next?**

Enter a book you like, and the site will analyze their database of real readers' favorite books (over 32,000 and growing) to suggest what you could read next. (You can register on the results page and build your own favorites list)

### **Project Gutenberg**

The Project Gutenberg philosophy is to make information, books and other materials available to the general public in forms a vast majority of computers, programs and people can easily read, use, quote, and search.
